

Medium 1, ϵ_1 , $\mathbf{D}_1$

$d\mathbf{a}$

Medium 2, ϵ_2 , $\mathbf{D}_2$

t

The diagram shows a 3D perspective of a rectangular slab with a light blue top surface and a darker blue bottom surface. The slab is positioned at the interface between two media. The top surface is in Medium 1, and the bottom surface is in Medium 2. A vertical arrow labeled $d\mathbf{a}$ points upwards from the center of the top surface. A vertical double-headed arrow on the right side of the slab is labeled t , representing its thickness. Dashed lines show the hidden edges of the slab, including the bottom edges and the back edges.
